

Manual Test Plan

Zhanyan Zhu

My data visualization includes two parts:

1. Line chart of last year of commit activity data
2. Pie chart of top-5 contributor commit counts

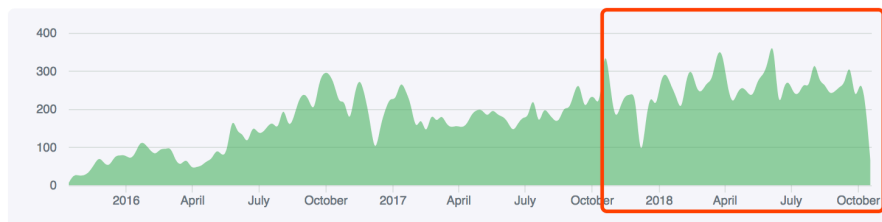

I choose two repositories “facebook/react” and “tensorflow/tensorflow” to test my data visualization. In each repo, I will test both line chart and pie chart by comparing the data in github.com.

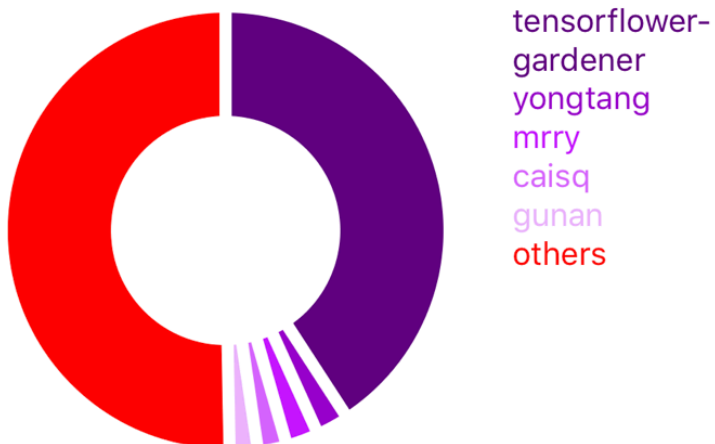

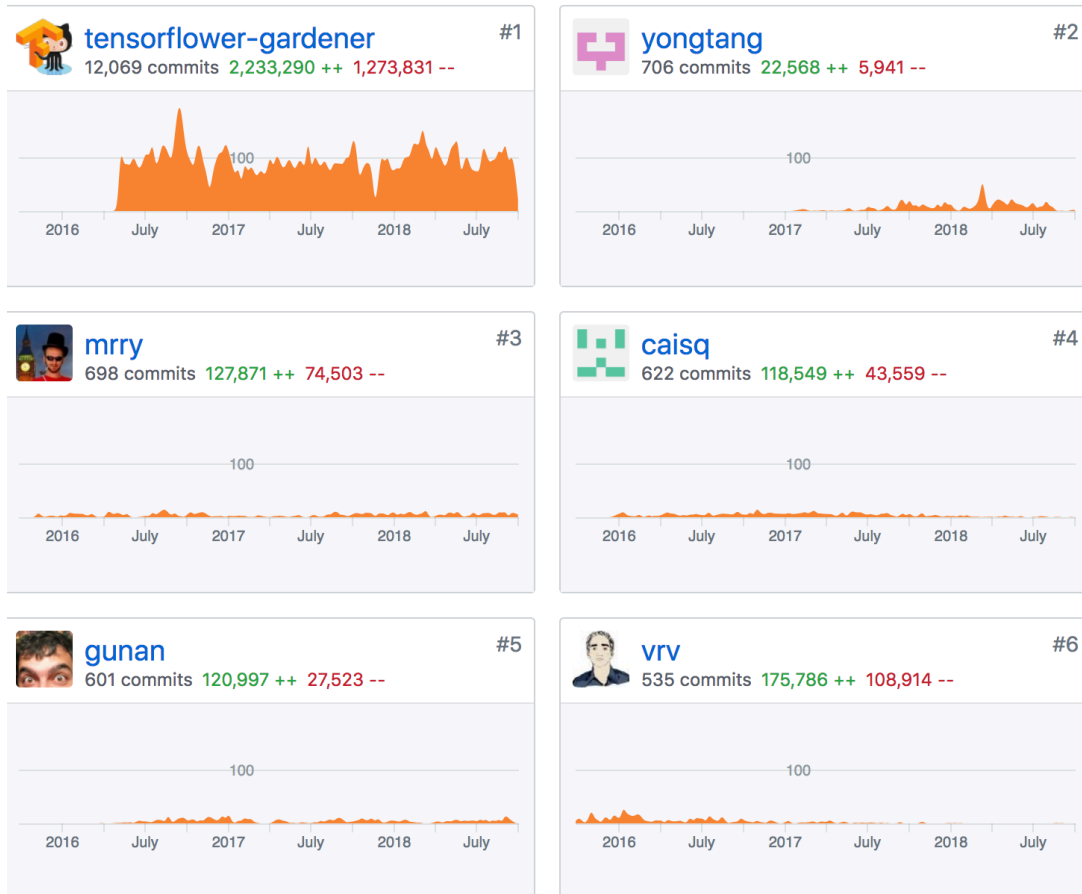

1. Tensorflow

Nov 1, 2015 – Nov 6, 2018

Contributions: Commits ▼

Contributions to master, excluding merge commits

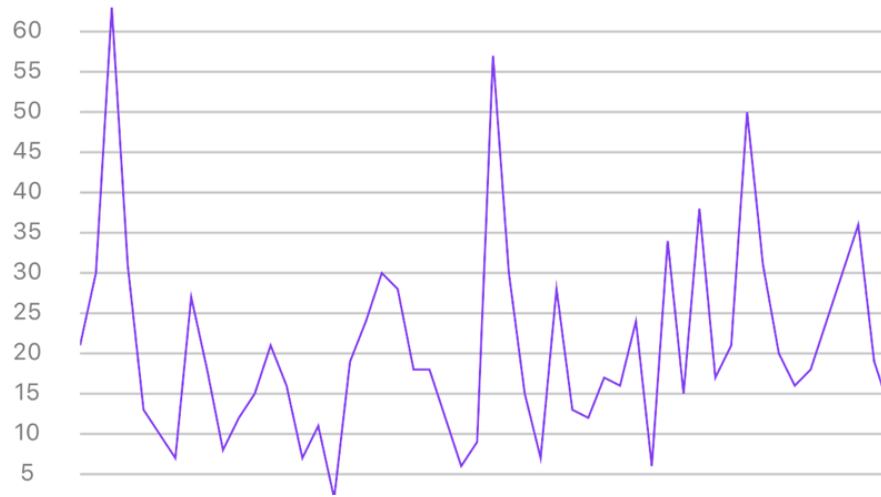

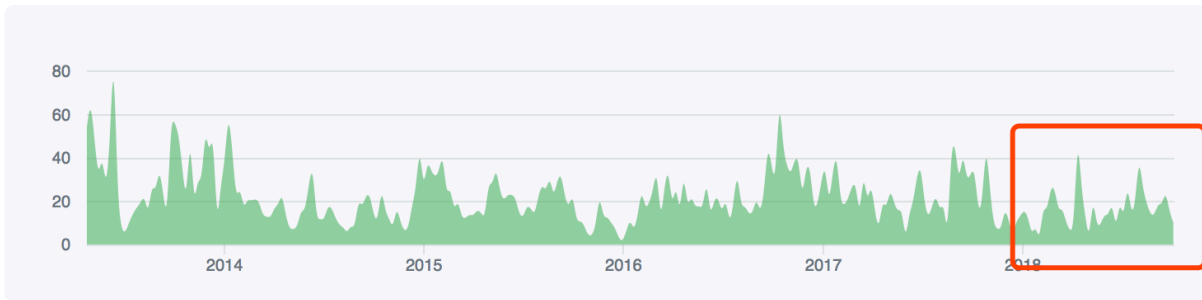

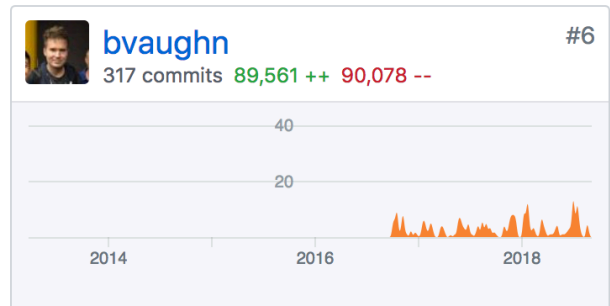

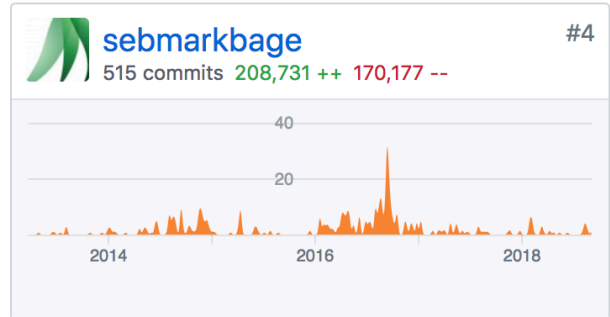

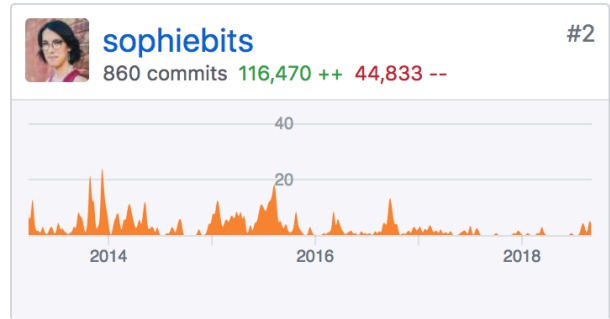

2.React

May 26, 2013 – Nov 6, 2018

Contributions: **Commits** ▾

Contributions to master, excluding merge commits
